

Proposal for DAOFlow

Hello DAOFlow Team,

We understand that your organization is looking to move beyond basic DAO structures and implement a comprehensive, enterprise-grade governance solution that supports robust voting, treasury management, and ongoing operational support as you scale.

Understanding your needs

Your current governance framework is limited to basic tools, which no longer meets the complexity and compliance expectations of an expanding enterprise DAO. You need a fully featured governance platform that can handle advanced voting mechanisms, transparent treasury controls, and integrated compliance features, all while ensuring reliable support to keep the system running smoothly during and after the transition.

Proposed services

- **DAO Governance Platform Setup** – \$6,000
- **Enterprise Support Retainer** – \$4,000

Investment & timeline

- **Total Investment:** \$10,000
- **Estimated Timeline:** 7 weeks

Next steps

Please let us know if you'd like to proceed with the full suite of services or if you prefer to prioritize one component. We're ready to kick off the project as soon as we receive your confirmation, and we'll ensure a seamless implementation that aligns with your governance objectives.
