

Proposal for NFTBay

Dear NFTBay Team,

We appreciate you reaching out to strengthen your NFT marketplace. Your project requires a robust security audit to safeguard critical smart contracts and a streamlined onboarding solution to help early adopters quickly integrate and start using your platform. By addressing both compliance and user acquisition priorities, we can lay a solid technical foundation that aligns with your growth ambitions.

Understanding your needs

The architect identified that you need a comprehensive security review of the marketplace's smart contracts to meet compliance and protect against vulnerabilities, as well as hands-on support to set up the storefront and onboarding flow for initial users. These two capabilities directly address the core technical gaps you outlined.

Proposed services

- **Smart Contract Audit** – Provides a critical security and compliance audit of your NFT marketplace's smart contracts, ensuring that vulnerabilities are identified and remediated before launch – **\$8,000**
- **Marketplace Storefront Onboarding** – Delivers technical implementation help for your early-stage marketplace integration and user onboarding, enabling a smooth first-time user experience – **\$1,500**

Investment & timeline

- **Total Investment:** \$9,500
- **Total Duration:** 3 weeks (2 weeks for the audit, 1 week for storefront onboarding)

Next steps

Please let us know if you'd like to move forward with this plan. We can schedule a brief call next week to confirm details and get the project started as soon as possible.
